BEE Level 4

COMPANY HISTORY

The founder, Corrie Klaassen, opened his first repair facility in Johannesburg in 1973, the success of which led to the opening of three subsequent businesses. Eventual trends led to him selling off some of these assets and consolidating the capital in 1984 with the opening of Hi-Tek Panelbeaters. In 1993, brother and sister team, Martin Klaassen and Brenda du Bruyn, took over management from their father, building on his formidable reputation and business acumen.

OFFICE AND ADMINISTRATIVE PERSONNEL

To ensure excellent customer care, Hi-Tek Panelbeaters has competent support staff that perform tasks ranging from reception, administrative work and finance. They assist our customers from start to finish during the entire repair process.

VISION

Since inception, we've had an ever increasing drive towards perfection and service excellence. Particular attention is paid to vehicle safety and the quality of our workmanship. Our business is driven by a passion for innovation and the setting of a benchmark in the vehicle repair industry.

MISSION AND GOALS

Our mission is to become the auto-reconstructive service of choice in Potchefstroom by consistently providing quality service, zero defect and cost effective auto-body repairs to the benefit of both the insurer and insured. We are driven by a passion to overcome all the inadequacies that exist in the auto body repair industry.

SERVICES

Hi-Tek Panelbeaters prides itself in offering a complete and inclusive spectrum of auto-reconstructive services, including post-accident remanufacture, ranging from private 'small' vehicles to heavy industrial trucks and automotive equipment, minor repairs to complete re-spray and restoration services for special vintage vehicles. Hi-Tek also offers highly specialized chassis straightening services and equipment.

WORKSHOP

Hi-Tek Panelbeaters is a 4000 square meter facility and the workshop consists of work bays: strip and assemble bay, panelbeating bay, chassis straightening bay, primer bay, wash bay and three pressurised spray booths with qualified staff.

We only use original manufacturers specifications to repair a vehicle to its pre-accident state, preserving your factory warranty. Protecting you and your family's safety is at the heart of every collision repair we do.

SPECIALIST COLLISION REPAIR EQUIPMENT

-Celleste Bench:

We use this system for major accident repairs. The jig repair system gently and accurately pulls your vehicle to achieve a perfect match to factory dimensions, and all other specifications.

-Wedge clamp straightening towers.

The wedge clamp system is arguably the industry's most efficient and productive frame repair system. It is a very cost effective system for cosmetic body straightening with anchorage, measuring and pulling ability. The Wedge clamp system is very fast and simple.

-Chassis straightening floor anchor

PAINT DIVISION

A Good quality finish is vital in restoring a vehicle's overall appearance. Our technicians take special care to achieve a smooth, perfectly matched paint finish. We use water based as well as solvent based Spies Hecker paint which is used in conjunction with the digital color photo spectrometer, a computer aided colour matching system.

WARRANTY

Auto reconstruction is a delicate task that requires skill and quality throughout the whole process . The final result depends on both the paint products used and the refinishing process applied. We absolutely believe in the quality of our service. Vehicle repairs and the products used are 100% covered by our service warranty. Included in the service warranty is the endorsement of all paint work and consists of a lifetime guarantee. This provides long term piece of mind to our customers.

BANKING DETAILS

Banking details will be provided on request by the accounts department.
